

Hy-Line International is searching for an experienced Animal Biology or Poultry PhD for an exciting opportunity as **Global Genomics Laboratory Manager** at our Dallas Center, Iowa Campus.

This position is part of a succession plan. The successful candidate will first collaborate with the current manager to acquire a deep familiarization with the Hy-Line R&D program and the R&D programs of the sister companies of Hy-Line. After a transition period, they will take over full responsibilities.

The Hy-Line International Molecular and Genomics Laboratory is part of the Hy-Line R&D department. The Global Genomics Laboratory Manager is not only head of the laboratory but also has global coordination responsibilities. The position reports directly to the Chief Technology Officer of the parent company of Hy-Line International.

Ideal candidates will demonstrate a result driven, innovative mindset, excellent interpersonal communication skills, enjoy managing a team, and believe in the company's mission and vision.

To meet our expectations, a willingness to travel both domestic and international approximately ten percent of your time, will be required to attend both internal and external meetings.

At Hy-Line International we strive to have a great atmosphere so employees can achieve their best. The company's employee benefits package is top notch. Hy-Line International believes in the value of diversity within our workforce and is an equal opportunity employer. Candidates will be required to successfully completed a pre-hire drug and background screening.
